REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant claims as amended are defined over the prior art of record. Currently, British reference 177,433 appears to be closest to the instant claimed invention in independent claim 1. In the British reference, shoe 1 is supported by angle member 2, which is readable as a mounting; and said angle member or mounting is connected to fourth leg 4 by a connection in the form of a bolt fastener. As described on page 3, lines 9-18 of the British reference, angle member or mounting 2 is to be made of a material that it would break in an accident so as to prevent damage to other parts of the current collector assembly. In the British reference, the predetermined breaking point is in the angle member and not in the connection member. Note that the term "breaking point", as read in light of the instant specification and in light of the prior art, such as the British reference, would clearly be understood by one skilled in the art as a safety feature, which does not cover every structure that can be broken when it is subjected to a high enough force.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 571-272-6682. The examiner can normally be reached on Mon-Fri (9-6), except day-off Wed.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
